CAREER OBJECTIVE

Computer Science student and full-stack JavaScript developer who builds and deploys web applications with Next.js, Express.js, and MongoDB. Seeking a junior developer role where I can ship reliable, secure features and keep growing with a strong engineering team.

SKILLS

- **Languages:** JavaScript, TypeScript, HTML5, CSS3
- **Frontend:** React, Next.js
- **Backend:** Node.js, Express.js, REST APIs
- **Database:** MongoDB
- **Tools:** Git, GitHub, Vercel, VS Code
- **Interpersonal:** Problem-solving, communication, time management

PROJECTS

RenRide: Classic Car Rental Platform | Live | GitHub

Full-stack car rental app where users browse, search, and book classic cars. Built with Next.js, Express.js, MongoDB, and Better Auth, deployed on Vercel.

- Secure sign-up and login with JWT-protected API routes
- Car search and filtering
- Booking system with live booking counts

RecipeHub: Recipe Platform with Premium Content | Live | Client Code

Recipe app with a Next.js frontend and an Express backend, where users can unlock premium recipes with a one-time payment.

- Account authentication with Better Auth and MongoDB
- Stripe Checkout to unlock individual premium recipes
- Webhook-driven premium access on user accounts

Handmade: E-commerce Website | Live | GitHub

E-commerce website for handmade products built with the Next.js App Router, with Firebase authentication and protected item management pages.

- Firebase authentication for sign-up and login
- Protected Add Item and Manage Items pages for logged-in users
- Public landing page with 7 sections

EDUCATION

Bachelor of Science in Computer Science and Engineering, Daffodil International University | April 2026 – Present

Studying computer science fundamentals while building full-stack web projects with the MERN-style stack.
